

Practice 11

Deadline: 2 weeks from now. Should be checked onsite (during labs).

Task 1: Follow the tutorial step by step to complete Part I, II, and III. You need to demonstrate that both the query and update operations work successfully.

Task 2: Use a POST request to insert a new student:

```
###  
▶ POST http://localhost:8080/api/students/save  
Content-Type: application/json  
  
{"name": "Zoe", "email": "zoe@sustech.edu.cn"}
```

Show the updated state:

Student List

- 1 Mary mary@gmail.com
- 2 Alex alex@gmail.com
- 3 Dean dean@yahoo.com
- 4 Zoe zoe@sustech.edu.cn

Evaluation

The practice will be checked by teachers or SAs. What will be tested:

1. That you understand every line of your own code, not just copy from somewhere
2. That your program compiles correctly
3. Correctness of the program logic
4. That the result is obtained in a reasonable time

Late submissions after the deadline will incur a 20% penalty, meaning that you can only get 80% of this practice's score.
